Client Accounts Project Manager

bhavya93@gmail.com | 562-535-5757 | Los Angeles, CA | [linkedin.com/in/bhavvyadeep-kaur](https://www.linkedin.com/in/bhavvyadeep-kaur)

PROFESSIONAL SUMMARY

Dedicated Project Manager with 9+ years of experience for high-value global client accounts; currently overseeing end-to-end matter management including new matter intake, conflict coordination, and scope determination under an Alternative Fee Arrangement (AFA). Act as the primary client-facing contact, managing communications regarding billing, accruals, and matter status, and representing the team in recurring client meetings. Prior to DLA Piper, worked in several SDLC industries spanning financial services, software development, change management and testing. Highly experienced in all aspects of the software development lifecycle and end-to-end project management, from concept through to development and delivery. Proven skills developing methodology, processes and tools & workplans for building Strategic Transformation and managing cross-functional resources across multiple, simultaneous initiatives. Team-oriented individual promoting exemplary presentation, project management and risk oversight skills. Certified Scrum Master with definitive leadership qualities and strong critical thinking and decision-making skills.

WORK SUMMARY

Clients Account Project Manager

Dec 2024 — Present

DLA Piper (*Through Naviga Recruiting*)

Project 1: Billing, Planning and Management

- Manage and coordinate active matters, including tracking timelines and deliverables, monitoring task progress, supporting attorneys with workflow organization, and ensuring alignment with matter plans and deadlines.
- Maintain yearly client rate cards and update the rates for new timekeepers/existing timekeepers.
- Enter the time entries in Intapp for timekeepers on a monthly basis.
- Convert detailed billing, receivables, and matter information into clear business updates, insights, and recommendations that support informed partner and client decision-making.
- Drive follow-through on outstanding items by coordinating with clients, partners, billing personnel, collections staff, and client administration teams through resolution.
- Submit SBR's for any updated/change in rate for timekeepers using the billing guideline portal.
- Follow up with internal teams and facilitate next steps to maintain momentum.
- Assist with preparation of materials, summaries, and constructing response for the client to support billing for all clients like Kenvue, G6, Chipotle, etc.
- Track accruals, approved budgets, alternative fee arrangements, and matter-level financial activity to identify exceptions, emerging risks, or profitability concerns requiring escalation.
- Recommend and implement practical enhancements to workflows, communication practices, reporting methods, and service delivery processes.

Project 2: Manage High Value Global Client Project Management Work

- Obtained matter related requirements for high value global clients such as ID, matter name to run conflicts and provide to Legal team.
- Managed the information from DLA US and international attorneys needed to open new matters and assist the admin team.
- Receive client communications relating to AFA. Provide responses to clients with all information provided by other teams.
- Open matters that haven't been confirmed in/out of scope; identify when we have WIP and confer with clients to advise if the matters are in or out of scope of the AFA.
- Attend monthly Teams meetings with client and legal team.
- AFA inquiries — Receive/respond to questions related to the AFA from US or international team members, including rates, time entry narrative guidelines, differentiation between fees and cost matters.
- Matter Reopening — Communicate with client on reopening matters that client closed in Collaborati.
- Accruals — Coordinate and send out accrual requests to US and international timekeepers, and third-party local counsel. Report information to legal team. Input accruals in Collaborati. Respond to client communications relating to accruals.
- Rate Charts — Maintain and update client rate charts. Request rate templates for international timekeepers if they are not on the approved rate charts.

Project 3: AI-Driven Auto-Report Generator

- Created internal workflows for periodic litigation update reports that are generated for clients.
- Ingested data from weekly docketing reports, case dingers, and other periodic reporting mechanisms that contained information on upcoming deadlines, key dates, newly filed cases, current total case counts with relevant breakdowns (by jurisdiction, product, case status, or other categories), and any notable case developments, and automatically generated a polished, client-facing report that captures the key information clients need to manage their litigation portfolios.
- Helped attorneys and staff from repetitive reporting tasks, allowing them to redirect that time toward substantive legal work.

Technical Project Manager III

May 2024 — Nov 2024

UCLA (*DTS Department*)

- Worked on a UCLA - UCOP mandate project to strengthen the cybersecurity posture of the campus and protect network-connected assets from threats. The project focused on Asset & Data Visibility.

- Developed a central repository of IT assets through a ServiceNow configuration management database (CMDB) to better support and secure the campus.
- Facilitated working sessions with campus stakeholders such as Athletics department, Andersons school of management, School of Social Sciences, OARC and more to support UCLA's asset management discovery and ServiceNow CMDB integration.
- Provided guidance on data ingestion strategies to ensure accurate, consistent, and efficient asset tracking.
- Create and updated detailed project plans per campus unit to put risks in and action items; baseline asset count for tracking.

Project Manager II

Jan 2023 — Apr 2024

Green Dot Corporation *Client: Walmart*

- Successful delivery of \$1.6 Million project for Walmart. Responsible for key deliverables with all phases of project life cycle (i.e. feasibility study, requirements, analysis, ROI, business plan, design, testing, and implementation planning).
- Managing a team of ~80 resources including offshore and onshore.
- Developed project plans in Sciforma tool; tracked and approved time sheets; managed budget and resources.
- Set project management standards and methodologies, develop project schedules, Gantt charts, action/decision logs, RACIs, risk registers, meeting agendas/minutes, etc.
- Work with executives & program leaders, functional reps. and functional area leadership to define project scope and strategy.
- Co-chair and facilitates timely, efficient, and action-oriented project meetings, responsible for coordinating team operations, communications, and Executive reporting.
- Support change management and continuous improvement efforts across programs, identifying and addressing gaps and opportunities.
- Recognize cross-functional dependencies and overlap to maximize efficiency.
- Led preparation of integrated project plans and timelines, ensured effective management of project activities including testing and control of project timelines.

Technology used: Sciforma, Jira, Confluence, SharePoint, MS Office
